

What Do I Do With My Small Business Hazardous Waste?

The Small Quantity Generator (SQG) program at the Kitsap County Household Hazardous Waste Collection Facility is an environmentally safe and affordable disposal/recycling option for small businesses that generate hazardous waste in Kitsap and Mason Counties. SQGs MUST call Kitsap 1 at (360) 337-5777 to schedule an appointment prior to delivery.

YES

These materials are accepted:

- Cleaners
- Pesticides
- Oil-based Paints, Thinners & Stains
- Adhesives
- Automotive Products
- Motor Oil
- Batteries – Various
- Antifreeze
- Flammable Liquids
- Oxidizers
- Solvents
- Corrosives
- Mercury Containing Materials
- Pool & Spa Supplies
- Fluorescent Tubes & Bulbs
- Latex Paint
- Aerosols

Easy 3 Step Process for Hazardous Waste Disposal

STEP 1 – Qualify

You qualify as a Small Quantity Generator (SQG) when you:

- Generate less than 220 pounds of dangerous waste (25 gallons of typical liquid waste), with an accumulation limit of 2,200 pounds of dangerous waste on-site.
- Less than 2.2 pounds of acutely hazardous waste.

STEP 2 – Participate

Identify your waste:

- Review product labels and, if available, Material Data Safety Sheets (MSDS) for each waste type.
- Look for key hazardous words such as “warning,” “flammable,” or “dangerous.”
- Bring the MSDS or other informational materials that will allow facility staff to quickly identify waste materials once you have a scheduled appointment.

Submit the electronic worksheet to itemize your waste types prior to scheduling an appointment:

- Fax: 360-337-5678 or
- Online: <http://www.kitsapgov.com/sw/worksheet.htm>

You will be notified of the date and time of your appointment. Facility staff will contact you after reviewing your completed worksheet. They can answer questions, schedule your appointment, and provide guidelines.

STEP 3 – Package and Transport Your Hazardous Waste

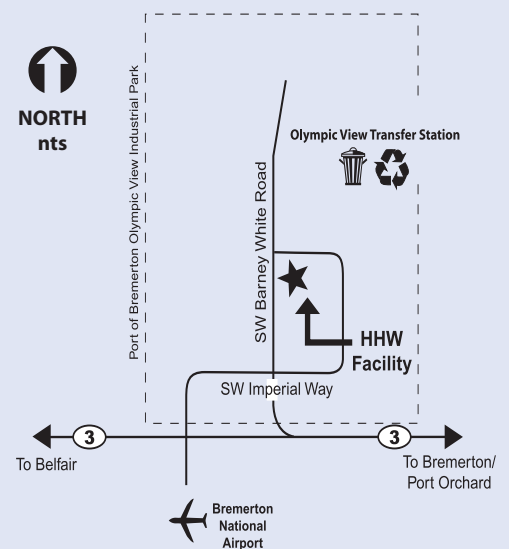

Properly package and transport your items:

Package

- All materials must be packaged in sturdy, non-leaking containers. Package all wastes in original containers, if possible. Tighten all lids.
- If you have a leaking container, place it in a larger container, such as a plastic bucket. Small leaking containers can be placed individually inside double Ziploc®-style sealed plastic bags.
- Do not mix different waste types in the same container.
- Always try to include an original label, MSDS, or note with information that identifies the waste contents.

Transport

- Always secure your load. Place the materials upright in your vehicle and brace them so they will not slop or tip over.
- For safety, transport the materials in your vehicle’s trunk or truck bed, away from the passenger compartment.
- You must comply with U.S. Department of Transportation regulations for hauling hazardous material. Go to www.phmsa.dot.gov/hazmat or contact program staff for more information.

Household Hazardous Waste Collection Facility

Business customers must call for an appointment.
